

**HOTTEST
ARTICLES**
ON ScienceDirect.com

INTRODUCTION

The ScienceDirect TOP25 Hottest Articles is a free quarterly service from ScienceDirect. When you subscribe to the ScienceDirect TOP25, you'll receive an e-mail every three months listing the ScienceDirect users' 25 most frequently downloaded journal articles, from any selected journal among more than 1,600 titles in the ScienceDirect database, or from any of 24 subject areas.

Now you can keep track of the latest trends in your speciality and find out what your colleagues are reading. A simple click on any of the listed articles will take you to the journal abstract, and of course, you have the option to download any article straight to your desktop, depending on your access rights.

Read more about [how the TOP25 is generated](#) and what it reflects.

Would you like to be kept posted on the latest **TOP25 ARTICLES** within **Science of Computer Programming?**

With these drop-down menus, the ScienceDirect TOP25 Hottest Articles are selected. Please refine your selection if necessary. To see the overall TOP25 within a certain subject area or journal, please select 'all subjects' or 'all journals' from the drop-down menus.

TOP25 articles within the journal: **Science of Computer Programming**

1. [Quantitative aspects of outsourcing deals](#) • Article
Science of Computer Programming
2. [Quantifying the value of IT-investments](#) • Article
Science of Computer Programming
3. [Object-oriented algorithm analysis and design with Java](#) • Article
Science of Computer Programming, Volume 54, Issue 1, 1 January 2005, Pages 25-47
4. [An interactive environment for beginning Java programmers](#) • Article
Science of Computer Programming, Volume 53, Issue 1, 1 October 2004, Pages 3-24
5. [Mutable strings in Java: design, implementation and lightweight text-search algorithms](#) • Article
Science of Computer Programming, Volume 54, Issue 1, 1 January 2005, Pages 3-23
6. [Roles in networks](#) • Article
Science of Computer Programming, Volume 53, Issue 2, 1 November 2004, Pages 195-214
7. [A survey of fault localization techniques in computer networks](#) • Article

- Science of Computer Programming, Volume 53, Issue 2, 1 November 2004, Pages 165-194*
8. [Behavioural inheritance in the UML to model software product lines](#) • Article
Science of Computer Programming, Volume 53, Issue 3, 1 December 2004, Pages 409-434
 9. [Architectural modifications to deployed software](#) • Review article
Science of Computer Programming, Volume 54, Issue 2-3, 1 February 2005, Pages 143-211
 10. [Software variability management](#) • Editorial
Science of Computer Programming, Volume 53, Issue 3, 1 December 2004, Pages 255-258
 11. [Quantitative IT portfolio management](#) • Article
Science of Computer Programming, Volume 45, Issue 1, 1 October 2002, Pages 1-96
 12. [A customizable approach to full lifecycle variability management](#) • Article
Science of Computer Programming, Volume 53, Issue 3, 1 December 2004, Pages 259-284
 13. [A Java-based system for building animated presentations over the Web](#) • Article
Science of Computer Programming, Volume 53, Issue 1, 1 October 2004, Pages 37-49
 14. [Formal methods: the very idea - Some thoughts about why they work when they work](#) • Article
Science of Computer Programming, Volume 42, Issue 1, 1 January 2002, Pages 11-27
 15. [A Java-based digital library portal for geography education](#) • Article
Science of Computer Programming, Volume 53, Issue 1, 1 October 2004, Pages 87-105
 16. [A spectral estimation toolkit for Java applications](#) • Article
Science of Computer Programming, Volume 54, Issue 1, 1 January 2005, Pages 125-142
 17. [Geometry teaching in wireless classroom environments using Java and J2ME](#) • Article
Science of Computer Programming, Volume 53, Issue 1, 1 October 2004, Pages 71-85
 18. [A global path planning Java-based system for autonomous mobile robots](#) • Article
Science of Computer Programming, Volume 53, Issue 1, 1 October 2004, Pages 107-122
 19. [Designing runtime variation points in product line architectures: three cases](#) • Article
Science of Computer Programming, Volume 53, Issue 3, 1 December 2004, Pages 353-380
 20. [Educational and technical design of a Web-based interactive tutorial on programming in Java](#) • Article
Science of Computer Programming, Volume 53, Issue 1, 1 October 2004, Pages 25-36
 21. [Algebraic reasoning for object-oriented programming](#) • Article
Science of Computer Programming, Volume 52, Issue 1-3, 1 August 2004, Pages 53-100
 22. [A semantic and methodological essence of message sequence charts](#) • Article
Science of Computer Programming, Volume 54, Issue 2-3, 1 February 2005, Pages 213-256

23. [Design-time product line architectures for any-time variability](#) • Article
Science of Computer Programming, Volume 53, Issue 3, 1 December 2004, Pages 285-304
24. [XML stream transformer generation through program composition and dependency analysis](#) • Article
Science of Computer Programming, Volume 54, Issue 2-3, 1 February 2005, Pages 257-290
25. [Implementing advanced spoken dialogue management in Java](#) • Article
Science of Computer Programming, Volume 54, Issue 1, 1 January 2005, Pages 99-124
